He was equipped with as many letters of recommendation as a patent medicine almanae, and withal proved himselfa very competent workman.

Berlin, Sept. 19.—The publication of Count Von Buelow's circular note, demanding the punishment of the which was made through the Nord Deutsche Allgemeine Zeitung, was decided upon because it was deemed best to let the world see that Germany had nothing to hide regarding her real aims in China. The diplomatic corps here so interprets it.

London Papers' Comment.

The London morning papers have little but praise for what is called Germanys "admiratile note." The Times goes so far as to wish that the recidit for making such a proposal belonged to Great Britain.

The Morning Post alone in a cogent and well reasoned editorial points out a grave objection, namely, that if the real authors and instignates of the uprising should prove to expected that they will deliver themselves up, and that if the Chinese government should be designated as guilty, it would be under the ban of the powers, a condition of things only terminable by the conquest of China or a revolution producing a new government.

For the powers should carefully weigh the matter before committing themselves."
